

PRESS RELEASE

Harrington Blue & Partners and Tomaselli & Associados Consultoria Ltda. Establish Strategic Alliance to Advance UK–Brazil Investment and Commercial Growth

London, United Kingdom / São Paulo, Brazil | July 2026

As economic cooperation between the United Kingdom and Brazil enters a new phase, Harrington Blue & Partners and **Tomaselli & Associados Consultoria Ltda.** have entered into a strategic partnership designed to strengthen cross-border investment, facilitate market entry and support organisations seeking long-term growth across both markets.

The alliance creates a dedicated platform for businesses, institutional investors and public-sector stakeholders looking to navigate opportunities between two economies that are becoming increasingly interconnected through infrastructure, energy transition, advanced manufacturing, logistics, technology and critical minerals.

Combining **Harrington Blue & Partners'** international advisory capabilities with **Tomaselli & Associados Consultoria's** deep market expertise and established presence in Brazil, the partnership offers clients an integrated approach to commercial expansion, investment facilitation and strategic execution. The collaboration is built on a shared understanding that successful international growth requires more than access to markets, it requires trusted intelligence, local relationships and the ability to translate opportunity into measurable outcomes.

At a time when companies are reassessing global supply chains, diversifying investment destinations and seeking resilient long-term markets, Brazil has become one of the world's most compelling investment landscapes. The country's scale, industrial capacity, natural resources and ambitious infrastructure agenda continue to attract international capital across multiple sectors.

The partnership will provide strategic support throughout the investment lifecycle, including market-entry strategy, commercial representation, government engagement, business development, investment sourcing, regulatory navigation and the identification of strategic partners. Together, the firms will assist organisations in reducing market-entry risk while accelerating commercial opportunities between Brazil and the United Kingdom.

"The future of international business belongs to organisations that can bridge markets with credibility, intelligence and trusted relationships," said **Susana Ecclestone**, Chief Executive Officer of Harrington Blue & Partners. "Brazil represents one of the most significant growth markets. By combining international strategic advisory with deep local expertise, this partnership creates a powerful platform for companies and investors looking to establish a meaningful presence across both jurisdictions."

Representatives of **Tomaselli & Associados Consultoria** added:

"Successful international expansion is not achieved through strategy alone. It happens when businesses have trusted local partners who understand the market, open the right doors and remain committed throughout the entire journey. This alliance reflects exactly that philosophy, combining global perspective with hands-on execution to help organisations build meaningful, long-term business relationships between the UK and Brazil." — **Claudia Tomaselli**, Managing Director, Tomaselli & Associados Consultoria Ltda..

About Harrington Blue & Partners

Harrington Blue & Partners is an international strategic advisory firm headquartered in the United Kingdom, specialising in cross-border investment, international market entry and commercial expansion. The firm advises corporations, investors, governments and family offices on complex international projects spanning infrastructure, energy, mining and critical minerals, transportation, technology, real estate, education and strategic communications. Through a global network of partners and institutional relationships, Harrington Blue & Partners connects capital with opportunity across Europe, Latin America, the Middle East and Asia.

About Tomaselli & Associados Consultoria Ltda.

Tomaselli & Associados Consultoria Ltda. is a Brazil-based international business development and strategic advisory firm specialising in market entry, trade and investment promotion, commercial representation and cross-border business expansion. Leveraging more than three decades of international trade and investment experience, the firm supports corporations, government agencies, economic development organisations and institutional partners seeking to establish and grow their presence in Brazil. The firm also serves as the official Brazil representative for international trade and investment organisations, helping strengthen commercial ties and facilitate bilateral business opportunities. Through a combination of strategic market intelligence, trusted local relationships and hands-on execution, Tomaselli & Associados helps clients identify opportunities, build sustainable partnerships and successfully navigate the complexities of the Brazilian market.
